NEWS

HOW TRUMP IS LICENSING ANIMAL CRUELTY AT ORGANIC FARMS. NEWS ID: 8397

AUTHOR: Azim

DATE: 2018-01-05 00:00:00.0

Under current organic food rules, egg farmers can cut off the beaks of hens and cram tens of thousands of birds into a single barn, with almost no access to the outdoors. Organic milk can come from cows who have their tails chopped. The testicles of pigs raised for organic bacon can be ripped out without any painkillers. The list of unconscionable (but customary) horrors goes on. In 2016, the Obama administration sought to end this cruelty and deception with a proposed rule that set minimum animal welfare standards for organic farms.

CLIMATE CHANGE: SOIL ANIMALS CANNOT EXPLAIN SELF-REINFORCING EFFECT NEWS ID: 1356
